INTRODUCTION

The objective of this deliverable is to describe the project's notice boards and signs that have already been created and placed at the beneficiaries' premises. A short description of each of them and the photographs depicting the exact location where they were installed are included in this deliverable.

1. NOTICE BOARDS

The installation of notice boards is considered to be very important for the dissemination of the project. They are used for attracting interest on the project within the project's targeted area. Furthermore, they are used as a way of informing the locals, and mainly the farmers, that the project is financed by the LIFE Programme. 6 notice boards (2 per pilot area) were purchased and displayed, as shown in the next chapters, in strategic places in the three pilot areas, where Agricultural practices will be implemented. The structure of the notice board, as presented in Fig. 1, is the following:

- Top part of the board: the LIFE and AgroClimaWater logo and full title of the project.
- Middle part of the board: a brief description of the LIFE AgroClimaWater project, concerning the financial data (budget, EU funding, Beneficiaries funding), the implementation period and the targeted areas
- Bottom part of the board: the information and logos of the AgroClimaWater partners
- Left part of the board: the photograph used is the one that was selected for the project's poster and roll-up banner, as thoroughly described in the Sub-Deliverable E.1.1.1.

The size of the notice board is approximately 2 x 1.5 m and its material is metal.

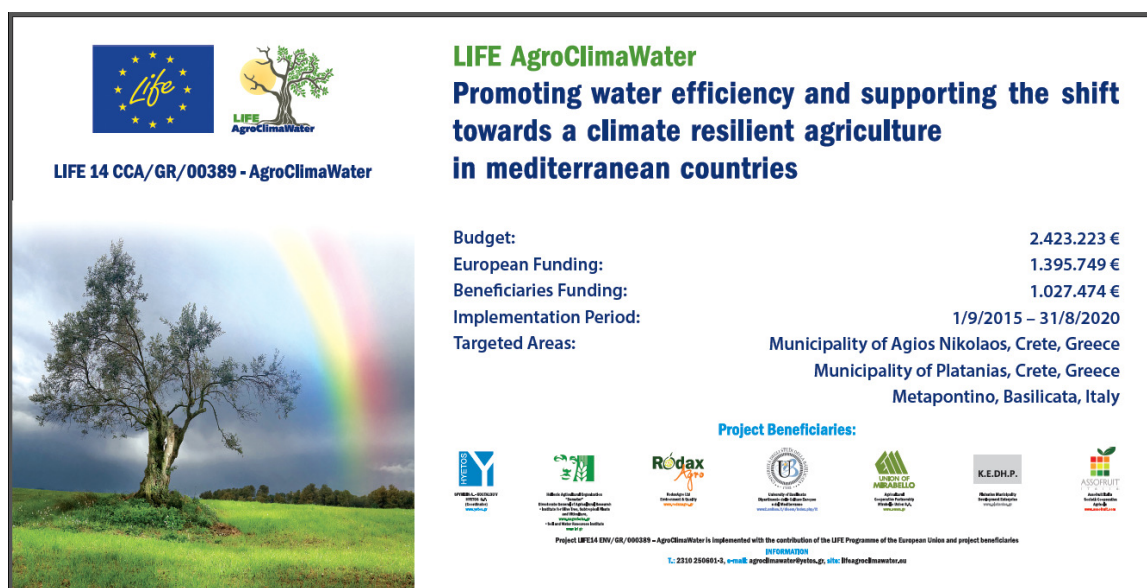

Fig. 1: Project's notice board

The following chapters present the location where the notice boards are installed in the three pilot areas.

1.1 Assofruit Italia Società Cooperativa Agricola

AFI purchased and installed both notice boards in places that are considered to be important for the dissemination of the project (Fig. 2 & Fig. 3)

Fig. 2: Installation of the first notice board in Cooperativa Nicofruit of Tristano Alessandro

Fig. 3: Installation of the second notice board in AFI premises

1.2 *Platanias Municipality Development Enterprise*

KEDHP installed both of the notice boards in strategic places (Fig. 4 & Fig. 5) in order to inform the respected stakeholders for the implementation of the project.

Fig. 4: Installation of the first notice board in Voukolies

Fig. 5: Installation of the second notice board in Gerani

1.3 Agricultural Cooperative Partnership Mirabello Union S.A.

Mirabello at first created a different notice board (Fig. 6) and installed it in its premises. Then after the guidance of the Coordinating Beneficiary (CB), the new notice board was purchased and installed in a pilot parcel located in the pilot sub-basin as depicted in Fig. 7.

Fig. 6: Installation of the first notice board in Mirabello premises

Fig. 7: Installation of the new notice board in a pilot parcel in Havgas-Milatos sub-basin

2. NOTICE SIGNS

The installation of notice signs is considered to be as important for the dissemination of the project. It informs all interested parties or individuals that the beneficiaries work for this particular project.

Every beneficiary had to purchase and place the sign at their premises. 9 signs were developed and installed. The structure of the sign concretely is (Fig. 8):

- Top part of the sign: the LIFE and AgroClimaWater logo
- Bottom part of the sign: it is clearly stated that the project is implemented with the contribution of the EU and the project's beneficiaries.

The size of the sign is 20 cm x 30 cm and its material is plexi glass.

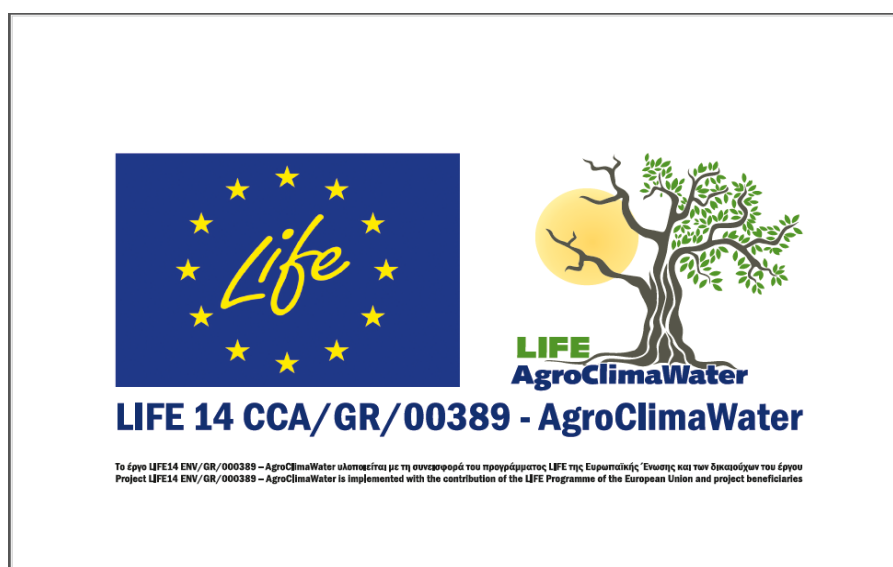

Fig. 8: Project's notice sign

The following chapters present the location where the notice signs are installed in the beneficiaries' premises.

2.1 HYETOS S.A.

Notice sign is displayed in a prominent position at the entrance of the offices of HYETOS. One of the first things anyone will notice when visiting the office of HYETOS is the notice sign of the project (Fig. 9).

Fig. 9: Project's notice sign installed in HYETOS' office

2.2 Assofruit Italia Società Cooperativa Agricola

AFI installed the notice sign in its headquarters in order to publicise the project, as shown in Fig. 10.

Fig. 10: Project's notice sign installed in AFI's office (Andrea Badursi's office – General Manger of AFI)

2.3 Institute for Olive Tree, Subtropical Plants and Viticulture / Hellenic Agricultural Organization "DEMETER"

IOTSP installed its sign in its premises in a prominent position (Fig. 11), where its offices are located.

Fig. 11: Project's notice sign installed in IOTSP's office

2.4 Platanias Municipality Development Enterprise

KEDHP installed two signs in the entrance of its offices one in Voukolies (Fig. 12) and one in Alikianos (Fig. 13).

Fig. 12: Project's notice sign installed in KEDHP's office in Voukolies

Fig. 13: Project's notice sign installed in KEDHP's office in Alikianos

2.5 Soil and Water Resources Institute / Hellenic Agricultural Organization "DEMETER"

LRI placed the sign in the main entrance of the Institute, where all signs of other LIFE programmes are installed as well (Fig. 14).

Fig. 16: Project's notice sign installed in RodaxAgro's office

2.8 University of Basilicata – Dipartimento delle Culture Europee e del Mediterraneo: Architettura, Ambiente, Patrimoni Culturali

The project's sign has been installed at DiCEM site and specifically in Professor Dichio's office (Fig. 17).
